NUMBER OF EMPLOYEES

STATEMENT BY FIRM G.L. Frost Architecture is a small, dedicated firm with ample experience in a variety of project types throughout Maine. Educational, Historical, Commercial, Financial Institutions, Churches, Libraries, Healthcare Institutions and residential homes are all part of our past work. Past project experience ranges from \$23 million dollar state of the art facilities to single family custom designed homes. We enjoy the process of bringing an idea through design and finally to the physical realization of a building. We are true believers that the built environment effects the way people work, learn, interact, worship and perceive the world around them. We feel it is the architect's charge to ensure that all building design is done responsibly to better the community in which any structure is built. It is with these beliefs in mind that G. L. Frost Architecture was founded. We strive to bring client satisfaction and a passion for well delivered and designed architecture together on every project with which we are involved.

PRE-QUALIFIED FOR Architectural
